What's New in the Joomla Password Reset?

Joomla Password Reset - has an easy to use interface which allows you to reset your Joomla database password with a simple click. Simply enter your database's new password in the form provided, click the button and copy the password to your clipboard. Once your password is copied to the clipboard, paste it into the password field on your Joomla admin panel. Windows - The download file of this utility is limited to 5MB in size. As such, you should keep this in mind before downloading it. But if you have downloaded the program and want to upgrade it, you can go to the portable version of Joomla Password Reset Portable. File size - 100KB Interface - Features - News Beware of SQLi: Admin Dashboard Severely Hacked A new trend in web hacking is using SQL to compromise servers and websites. A cybercrimer group called Liquid Exploits is behind a security flaw that allows a SQL injection attack that allows them to dump administrator accounts on hacked websites. "You're not just dumping database. You're dumping the admin user account, which gives you complete control," says Mike Davidson, Chief Technology Officer of security firm International Computer Security Association (ICSA). Welcome to PHPz This is the web home of PHPz. We are a non-profit project, which is still in development. We provide a small number of PHP scripts for free. So if you have time and want to help us on this project, we are looking for people who are interested in this topic. You can either make php scripts or contribute to the development of our scripts. We are currently developing a script that will automatically load all content pages of a website and will categorize them. It will also automatically include all subpages of a website in a category. PHP Security Guide This document is meant as a guide for those who are new to PHP, as well as a reminder for those who are already more experienced in PHP. It covers different topics in PHP security, including the importance of safe coding practices, how to avoid SQL injections and a few tips on how to secure your PHP applications. We also discuss the basics of server security and a few useful server settings. PHP SQL Injection
