Thanks for visiting the site, content provided by Fafhrd.Q: Create tag with default value via Ansible playbook I have an already configured Ansible playbooks. One of my task is to validate some preconditions (servers are used or not,...), so I'd like to warn about this preconditions failure with an Ansible meta module. Basically I'd like to create a tag on my local computer and set a default value if needed. If a device is not in my host list, I have something like: - hosts: myServer roles: - mysql tasks: - include:../common\_playbook.yml when: mytag\_on == 'all' - hosts: myServer roles: - mysql tasks: - include:../common\_playbook.yml when: mytag\_on == 'empty' My intention would
