Provides a single view for Clearcase-based components, project hierarchies, and their corresponding LSM-style files, such as DIF files. You should just use ClearCase to VOBs

---

(Versioned Object Blobs).  
This is from here (see below): ClearCase is a component-based versioning system. It is similar to SCCS, RCS, and other centralized revision control systems. A versioned object is a collection of files that have a version associated with them. Objects that are included

---

in a versioned object are stored together so that the version control system has only one place to keep track of which changes occurred, allowing recovery or recovery from multiple objects. The versioned object is defined by the version history that is kept in the database, and the VOB must

---

contain all the needed objects to be truly versioned. So you should use ClearCase, as you just want to know what was changed. Store The Highpower Quartz Emergency Stopwatch with un-winding feature is designed for use as an emergency stopwatch. The un-winding feature of this stopwatch allows
