A quick-power trip through a futuristic world where humanlike robots called cybodies have taken over the world. Resistance is a forgotten thing, cybodies are everywhere and the rebels are led by an impossible hero. Visit the main story page for more details: [Download Outlandia on Steam](#): You make the call, we're prepared: Read about some of our go-to turret configs. We're still kicking around some different turret configurations for Space Engineers. While most of the options we are testing are still very much up for debate, here's our current shortlist: - Single 120mm turret, mounted on the mid hull - Dual 120mm turrets mounted on the rear hull (high or low) - Single 275mm turret, mounted on the rear hull - Dual 275mm turrets mounted on the rear hull (high or low) (It's important to note that this is not an exhaustive list. Our primary objective is to see how turrets interact with various parts of the vehicle, not just how much we like them.) The turret The turret is the common denominator that links everything else together. For example, a dual turret set up on the rear hull sides would basically be a fancy different-color version of the standard dual turret setup. The turret set-up will have some repercussions on the direction the vehicle will face, which means the turret will be the first thing that will need to be reconfigured to get the vehicle to face the correct direction. Road-ready? We're not sure yet if we are going to implement turrets or not. We are aware that turret mounts tend to interfere with other components, such as lower skirts, and we don't want to go that route. However, we will definitely take the feedback seriously and we will only proceed with turrets if we find a good way to integrate turrets into the game without too much impact on other parts of the vehicle. Try them out, let us know your thoughts. We are slowly but steadily working on the physics systems for the game. As the final milestone of the physics implementation gets closer we will be able to share more details. For the moment, here are the bare minimal requirements to run the game: Processor: We are testing on a quad-

to order to use the Music and Sound effects in TCSTRIKERS2 game, you will need to download the Soundtrack (or bundle) Title: License: Size: Compatibility: Welcome to Siliconera's TCSTRIKERS2, a sci-fi action RPG about an average guy on the run. The only thing standing between him and freedom is his conscience, the will of a faceless, forgotten evil and, ultimately, his very survival. Built around the first-person player's interactions with both the citizens of Frontier and enemy combatants alike, the entirety of the TCSTRIKERS2 experience unfolds in a seamless open-world environment. Using your enhanced vision to uncover cryptic clues scattered throughout the frontier, the TCSTRIKERS2 story unfolds around you as you slowly build your escape from the corporations and the horrors they hold. Your character will be broken down and rebuilt in the process, based on the events that unfolded before and after his last escape from incarceration. If your last name is Hunter, then you're in luck. If it isn't, then you're likely looking for an out. TCSTRIKERS2 is an independent project developed by Sudden Strike's lead writer and original composer, Jan Halabala, a veteran of over 30 years as a composer, arranger and orchestrator. He is joined by a host of seasoned members of the video game industry, including artists who have worked on all major Sony, Ubisoft and Platinum titles and more than a dozen genre classics. Built by a team of volunteers around the world, TCSTRIKERS2 is a chance for those who love games to be involved in creating content that will live on forever, while also bringing a few broken souls back to the world of reason. Back in 2009, Jan, along with the TCSTRIKERS2 development team, helped break Sudden Strike into the indie scene when he was invited to take over the soundtrack project. "In doing this, we decided to make TCSTRIKERS2 a unique story about the character's actions and reactions to the AI and to the people around him. From this, we have our story and the music was born." Our TCSTRIKERS2 campaign mode has three playable characters in the story mode. Each of these characters has different story backgrounds

It's August 12th and so, we have another update for you. Nice to meet you again! Well, we are making great progress on getting all of the features ready to go for Pathfinder 1.8.0. The basics are done, and we will be focusing on the rest of the new features in the next two weeks! In other news, we have a new wizard (or warlock, if you prefer) and a new dragon this time. We hope that you are as excited as we are about them. Be sure to check in on the forums for more information and get ready for the all-new Session Zero in the month of September. The new wizard has been added along with a few new spells! The new dragon will be released next month, along with hundreds of new spells, and hopefully our old friends too. This week has been a round-the-clock effort, but we have marked the first day of DDNITE stuff, so let's get to the update: New Wizard But not my favorite kind: We've released a more fitting looking wizard for Todd and his crazy ninja gang! Why is Todd the famous adventurer? Because he is often the one who tries out the new, exciting adventures, and then ... goes and defeats them, thus delving into the most dangerous dungeons of all ... with success! The story behind Todd is an interesting and fun one, so we hope that you enjoy him on your adventure via the Tavern! Todd is a master of most of the core game systems available for Free Fantasy Grounds: character creation, treasure generation, and encounter generation, spell selection, actions, skills, and macros. He's also an expert when it comes to character progression, and has his own ideas when it comes to different levelling styles. If Todd inspires your creation, then feel free to drop by our forum and join the "Free Fantasy Grounds" group! He also has pets available, if you're interested in helping with his stats. These pets are all non-collateral effects
