AniFX Crack [Mac/Win]

AniFX is a professional software application developed to help you create and edit mouse cursors. Although it comes packed with a multitude of dedicated parameters, it sports a clean and straightforward layout. AniFX gives you the possibility to upload files into the working environment by simply dragging and dropping them or using the built-in browse function. Plus, the program offers quick access to the files and folders stored in your computer, so you can quickly select the items to be processed. It works with the following file formats: CUR, ICO, ANI, BMP, PNG, JPG, GIF, EXE, OCX, and others. It is possible to create a static (CUR) or animated cursor (ANI), select the color scheme, and pick the size of the cursor from predefined values or manually specify the desired size. AniFX allows you to resize and crop the images, set the transparency, preview the pictures, zoom in or out, as well as perform basic editing operations (cut, copy, paste, delete). What's more, you can undo or redo your actions, set up the x and y coordinates for the cursor hotspot, embed text messages, fill areas with different colors, use a spray, brush, and pencil, insert lines, rectangles, and ellipses, as well as flip or rotate the images to different angles. You can chose between a wide range of special effects (e.g. grayscale, emboss, sharpen, blur), apply shadow and fade out effects, alter the levels of brightness, contrast, hue, saturation, and opacity, take a snapshot with the current cursor and embed watermarks, as well as perform batch operations when it comes to creating cursor from images or vice versa. One of the top features bundled into AniFX is a smart system which lets you test the functionality of your cursor in a dedicated pane, where you can click on different buttons, check a box, or select an option from a drop-down list. All in all, AniFX proves to be a reliable application that provides a decent pack of features, excellent output results, and an intuitive layout for helping you create static or animated cursors. Key Features: 1) Create & edit mouse cursors and shapes. 2) Ability to create static or animated cursors. 3) Over 200 special effects for creating mouse cursors. 4) Ability to import images for creating the mouse
