Calibre is a terrific free online e-book reader which is available for Windows, Mac, and Linux. It works well for example with the Calibre e-book management software. Calibre Features: - Synchronizes all of your e-books - Lets you add tags to your e-books - Lets you rate and comment on your e-books - Lets you download e-books - Lets you edit books - Allows you to create an offline copy of a book - Allows you to take notes while reading - Lets you create playlists - Lets you have multiple views of the same book - Allows you to create lists of books - Allows you to find books by author, title, and ISBN - Supports a variety of languages (9 in English, 16 in Spanish, 2 in German and Portuguese, 1 in Japanese, and 1 in Chinese) BlogPress is a blogging software and online publishing platform. It was released in November 2005, built by Leo Wang and Jeffrey Long. BlogPress is part of the AudienceNetwork subnetwork of the web hosting provider Hostgator. BlogPress is a blogging software, which allows you to create a blog easily without having to go through a long learning process. You may already be familiar with blog related tools and services, such as Blogger (which was the biggest blogging system on the Web as of February 2007) and WordPress.com. However, BlogPress is a much simpler solution. You can start a blog just by pointing your browser to BlogPress.org. Your blog is an entirely independent website, not connected to BlogPress in any way. You can use BlogPress to publish your RSS feed or FTP it to your own web server. BlogPress also includes a built-in FTP server. SynchroWeb is a software/applications development company focusing on the mobile and web development. We have built wide range of apps and websites, integrated in many others (Facebook, Twitter,

What's New in the?

Monitor tank levels and water quality Adjust light cycles and schedules Monitor water changes and nitrogen Make water tests and track results Manage filter systems for success Share tank data with friends and family on the Web Record your own notes on the tank and video CALCULATE TEMPERATURE SET POINT: ReefCon 2000 has a powerful calculating tool built in to help you set up temperature profiles for your heaters and lights. Select the temperature you want to be and ReefCon will show you how to raise it up to the next value on its 15 step temperature profile. You can then copy and paste this profile into the temperature set-up window for your heater and light. When using the temperature measuring tool, ReefCon will calculate and display the approximate temperature of a tank based on the water temperature range that is set in ReefCon. SELECT LIGHTING OPTIONS: From the heating or cooling tab, you can set up lighting controls for the following options: * Daytime Light profile: The amount of light at night as it varies throughout the day. * Nocturnal Light profile: The amount of light at night as it varies throughout the night. * Daytime Light Schedule: The time of day that your lights turn on. You can change the time in increments of hours. ReefCon 2000 has 8 different days of the week that you can choose from. You can also set different amounts of light on each hour. For example, you can set it to zero light on Sunday, and the maximum light on Monday. * Nocturnal Light Schedule: The time of night that your lights turn off. You can change the time in increments of hours. * Tuning: you can adjust the temperature of the light if it is too warm or too cold. ACQUIRING AND CREATING TANKS: From the tanks tab, you can create your own tanks or import a tank from a file. To create tanks: * Select the spacing and size (LXLX) in the create tanks window * Select a name for your tank * Select the species (Fancy Saltwater, Cichlid, etc.) * Select a location (Deep Ocean, Sloping Sandy Beach, Happy Pad) * Click create when you're ready To import tanks: * Select the location (Any Location) * Click import * Scroll down to the tanks you want to add
