Looks like some of the  
content on this site is  
copyrighted. Documentat  
ion/screenshots etc. are  
sometimes released under

---

a different license. Did  
the link to  
HRVATSKI.zip work?  
Also there is a difference  
between the version of  
Word used to create this  
site and the version of  
Word you are running.  
Type systeminfo in a  
command prompt and see  
what version of Word is

---

running. Code: System  
Information How to:  
Press and hold the  
control key on your  
keyboard and press R.  
Click OK. A Windows  
System Information  
window opens. Scroll  
down the list of tabs to  
the System Summary  
section. Close the System

---

Information window by pressing OK. Re-run Word. Click the File menu. Select Open from the submenu. Navigate to where you have the installer of your software, usually C:\Program Files (x86)\ Select the installer file. Select Run. Follow the instructions on the

---

screen to restart Word.  
The system information  
window should reappear  
with a new tab added,  
called Additional  
Hardware. 595f342e71
