In C# you can create an interface that has default implementations of methods. For example: namespace MyApp { public interface ISaveable { void Save(); } } Then you can create a class that implements the interface. namespace MyApp { public class Saveable : ISaveable { public void Save() { // Save the data. } } } My question is: In Objective-C, can a class be an implementation of a protocol? Or is this not possible? For example af5dca3d97
