5 Free, Fast, Efficient: Download and Install Notepad++
Download Notepad++ How to install Notepad++? Step 1: Download the latest version of Notepad++ from the official website. In our case, it is Notepad++ version 6.5.3 For some reason, the download page says a new version is available, but when I click the link, it takes me to the instructions page for version 6.5.3. Step 2: Right-click on the downloaded.zip file and choose to extract the contents. Step 3: Right-click on the extracted.zip file again and choose "Run as Administrator" Step 4: Go to the "Program Files" directory and find the "Notepad++.exe" file Step 5: Double-click on the "Notepad++.exe" file and follow the instructions. Step 6: There are two components to Notepad++. If you get the error "There is no application associated with the document...", choose the File Menu and select Open. If the application installed successfully, choose the File Menu and select Open. Here's what Notepad++ looks like. Step 7: Type a file name, choose the directory, and click Open. Final Thoughts: Notepad++ has many things going for it. It has a huge list of features, including a linter, code folding, and much more. If you do any writing, then you must get to know this product. It is completely free to use.

One neat application that you could check out is FTE Text Editor. It's a useful software solution that allows you to create text documents and use some features. Small and lightweight graphical interface The application installs quickly and it sports a really small and compact graphical interface with many neat tools at hand. It doesn't come with any customization options, it would have been nice if it allowed you to add or remove icons from the toolbar. It doesn't even have any instructions, but you wouldn't really need them since the interface is quite intuitive. Create notes on your computer You simply need to launch the application and then start typing in order to create all sort of notes on your system. It allows you to change the font color, simply pick from a palette filled with all sort of available options. You can also add a text background color to highlight certain words or phrases. It doesn't have the option to create a bullet list, which is quite inconvenient. It also lacks some really essential features, you can't adjust the font style, size or even type. It lets you copy phrases from one section and paste them in another text document. Some more tools It allows you to cut words or phrases from the text document. It doesn't impose a character limit on your documents, which is quite nice. The application allows you to open documents from your computer, it supports some file formats like.ftef,.rtf and.txt. It also doesn't prompt you with a confirmation message when existing the program. When you're done writing, simply save the document on your computer in one of the available file formats. All in all, FTE Text Editor is a neat and small application for creating notes on your system, but it definitely needs some more tools and features.
