Photo Stream is one of the best new features of Lightroom 5; it allows you to associate photos with your nearby or cloud-based photo sharing service and automatically upload them to that service. One of the reasons why Lightroom has not received a deserved popularity and why people stay away from it is the lack of RAW Slideshow feature. Coming soon to Lightroom, you will be able to share your entire library of RAW photos with Slideshow power. Like it or not, without Smart Preview, a camera allows you to start to preview your photos with the camera's viewfinder. After taking your photo, you will have to switch the stand to the viewing position and once you have selected a photo, turn off the display of the screen and you will have a slideshow created.
