I've been using Photoshop for a couple of years and bought Lightroom for \$40 a few months ago to try to cut down, I hate Lightroom. Photoshop speed is horrible, the number one feature claimed in the press release is bull\$#@ and the learning curve is crazy. I'm sorry but this is the first review I didn't like and that I didn't finish. Sorry Adobe. I never thought I'd say this but I'd love to see the old days of Photoshop. Hello! Already used Photoshop for 8 years and would like to give the chance to try Lightroom for the first time. I installed both on a Windows 7 PC. I'm not an image guru, I have an iPhone 7+ and an iPad and am only finding Photoshop slow and operating slowly. Hope it calms down as I am a Photoshop whiz and have reworked over 40 projects with Photoshop since 1998! Super happy to be given a chance to try out Lightroom and will be working on a new product in the near future. Thanks.

Alex Dawes, Olympic Gold Medalist Hello! After years of using Lightroom and Photoshop at the same time, I wanted to switch to Lightroom in order to be able to work with RAW files. I was so very pleased when I tried it out. Within minutes you can import your photos from an SD card (or email) and organize them based on which camera created them. With the image preview window, you can see it's face, and even grab it directly into the editor (i.e., edit it directly in the editor window without having to first create a copy of it and then duplicate it in Photoshop). It is much more intuitive than Photoshop and comes with a wonderful feature that will save you hundreds of dollars in production costs in the long run by taking care of the many different file extensions (.jpg, .tif, etc.) and keeping them organized in folders and sub-folders. Thank you very much Adobe for making a new, updated version and I am very much looking forward to using it.

The Fill tool, formerly the Paint Bucket tool, fills any solid area with the color of your choice. It's great for solid backgrounds or coloring large areas. It can also be used to apply patterns to your images. The Gradient tool within the Fill tool lets you create a nice, faded background effect of the color of your choice. If you want to use this tool, first you need to draw a gradient layer and then apply it to the layer that you are using. The Gradient tool actually consists of two categories, gradient and paint bucket fill. The Paint Bucket tool has similar functions because the Gradient tool works the same way. Graphic design software in the early days was hard to use. Technology has come a long way, and software is now intuitive and helps a user express creativity more freely. Popular design and creative application Photoshop was made with the purpose of combining the tools that are required for a unified workflow. The searchable user interface and innovative interface design of Adobe Photoshop are the foundation of the world's best professional application. Its user-centric and powerful editing capabilities allow photographers and designers to create amazing finished products faster than ever with an intuitive, easy-to-use workflow, and more control and flexibility than ever before. There are a few products on this site that are similar to the Photoshop products, but the one that was most shared between users was Elements (<http://www.portables.com/product/photoshop-elements/>). To introduce the new 3D capabilities, Adobe has introduced a completely new product family, the new class of tools, called Adobe 3D. Adobe 3D products are designed to bring 2D or 3D art assets into Photoshop, and photo-editing solutions in general. The objectives of the products are to bring a comprehensive range of production-ready 3D content and a sophisticated workflow for 3D file creation, from editing and retouching, texturing, and lighting, to animating and rendering 3D models. According to Gartner, 65% of global organizations expect to use content-related mobile apps to drive revenue growth. With that in mind, the choice of mobile apps to communicate and collaborate just got a whole lot easier with Photoshop's new native mobile and browser-based versions. Photoshop now goes beyond toolsets and allows you to edit on any surface, with new mobile and browser-based versions available that allow you to work without an app on

any device or surface.
